

NEMIS – Web Capture Classroom Form

Step 1 Select the Capture App

1

Select the app menu

The screenshot shows a web interface with a search bar containing 'capture'. Below the search bar, there are two icons: 'Tracker Capture' and 'Capture'. The 'Capture' icon is circled in blue, and a blue arrow points from the callout box to it.

Step 2 Select the classroom form, school, and create new

1

Select the classroom form from the list of programs

2

Select school from the organisation unit list

3

Select "create new" to open the classroom form

The screenshot shows the 'Federal Ministry of Education - NIGERIA - Capture' header. Below the header, there are three dropdown menus: 'Program', 'Organisation unit', and 'Create new'. The 'Program' dropdown is open, showing 'D. 4 Staff Pre Primary and Primary School' and 'E. 4 Pre-Primary and Primary Classroom'. The 'Organisation unit' dropdown is open, showing 'Brilliant Primary School (xxxxxxx)'. The 'Create new' button is highlighted. Blue arrows point from the callout boxes to the respective elements.

Step 3 Capture the Classroom details

1

Select the report date for the annual school census

2

Capture classroom details. Mandatory fields are marked with an asterisk

3

Select "yes" to complete form

4

Select "save and exit"

The screenshot shows the 'New E. 4 Pre-Primary and Primary Classroom' form. The 'Basic info' section has a 'Report date' field (dd-mm-yyyy) and an 'Organisation unit' dropdown (Brilliant Primary School (xxxxxxx)). The 'Information on all Classrooms' section has several fields: 'Year of construction', 'Present condition', 'Length in metres', 'Width in metres', 'Floor Material', 'Walls Materials', 'Roof Materials', 'Seating: Are there enough seats for the children in this classroom?', and 'Good Blackboard: Does the Classroom have a good black board that the children can read from?'. The 'Status' section has a 'Complete event' checkbox (Yes) and a 'Notes' section with a 'Write note' button. The 'Save and exit' button is highlighted. Blue arrows point from the callout boxes to the respective elements.
